

SW-925

SW-925 is a straw wattle sediment barrier composed of 100% weed free agricultural straw matrix using a heavy-duty polypropylene grid casing. They reduce erosion, increase filtration, and retain soil for one to two years

Kansas Erosion LLC certifies our straw wattles are manufactured in the USA in accordance with our quality control program and ensure they meet or exceed the following specifications.

| | |
|----------|---|
| NETTING | Photodegradable $\frac{1}{2}$ " X $\frac{1}{2}$ " |
| MASS | 2lbs/LF Minimum |
| DIAMETER | 9" |
| LENGTH | 25' |

Kansas Erosion certifies our straw wattles meet or exceed the requirements set forth in Section 2114, Temporary Sediment Barriers of STANDARD SPECIFICATIONS FOR STATE ROAD & BRIDGE CONSTRUCTION – 2015.

SW-925 Wattles are palletized and shrink wrapped (QTY 15) per pallet.
